

Progress Report 3

- We switched from trying to gather MAC addresses for restrictions to creating user accounts for restrictions.
- Individual users can now have different time limit restrictions and individual restricted sites list.
- The users time limit setting and blocklist editing features have been implemented into the app.
- Our ethics and GDPR forms have been submitted and approved by the ethics panel.
- We can now see the websites a user has visited and how often they have visited each site using the squid logs.
- Improved UI of the app.
- We set up a scheduled task on the raspberry pi using Cron that clears the log file at midnight.
- Some issues found with whitelisting that need to be addressed.
